	Mythos Eros	R 35 052,00	3 250,00	1 800,00	1 300,00	The Eros is the machine above the X-1. At the price point it can make an impressive 80 cups of coffee per day and offer you 20+ drink options (programmable). Use the 4 liter water tank, or connect it direct to the water line.
	Mythos Echo	R 43 125,60	4 000,00	2 200,00	1 600,00	The Echo is Mythos' third biggest bean to cup machine, and can make an impressive 120 cups of coffee per day. For the price point you pay, this is indeed impressive! With a 7 inch LCD touch screen display, you can choose from 20+ programmable drink selections to serve a large number of people! The Echo houses a dual boiler which allows you to simultaneously make coffee and froth milk. The Echo Pro has the same features as the Echo, but comes included with a direct water connection and a payment gateway system to charge for the drinks on the machine.
	Mythos Aura	R 48 300,00	4 500,00	2 450,00	1 800,00	The Mythos Aura is a high-capacity bean-to-cup vending machine, designed to deliver up to 120 cups of coffee per day. Equipped with a 7-inch LCD screen, it allows for 7 programmable selections, catering to a variety of coffee preferences. The machine features an adjustable grinder and a coffee chamber accommodating 8-16g, ensuring each cup meets your desired strength and flavor. With a 1.2kg bean hopper and two 800g soluble canisters, the Aura is well-suited for environments with high coffee demand. Its integrated cleaning function and direct water connection streamline maintenance and operation.
	Mythos Icon 2G/2P	R 95 881,25	8 850,00	4 850,00	3 550,00	The Icon is Mythos' fourth biggest bean to cup machine, and can make an impressive 150 cups of coffee per day. With a 10.1 inch LCD touch screen display, you can choose from 30+ programmable drink selections to serve a large number of people! The Icon also houses a dual boiler which allows you to simultaneously make coffee and froth milk. One can also connect a payment system to the machine, to charge customers or employees safely and securely. Ask us for further info. The Icon 2 G has the same features as the Icon 2 P, but comes with 2 x adjustable grinders, 2 x 1.2kg bean hoppers and 1 x powder hopper. Extras: Aspen Pro Milk Fridge @ R13 110 Aspen Pro Twin (dual milk fridge) @ R15 870 (imported on order only)

	Gaggia Espresso Evolution	R 6 594,00	610,00	N/A	N/A	If you are considering to enter the world of espresso, but do not want to break the bank, then this is the machine for you. Produced by Gaggia in Italy, the Espresso Evolution is their entry level espresso machine that produces good tasting coffee with minimal effort. The Espresso Evolution boasts with some premium features at this price point. PID (proportional integral derivative), pre-infusion and a cup warmer are usually not part of entry level home barista machines, but added extras here.
	Lelit Anna PL41TEM PID Home Espresso Machine	R 17 394,00	1 650,00	900,00	650,00	The Lelit Anna PID is the perfect solution for those who are approaching the world of prosumer coffee machines: easy to use and immediately ready to make excellent coffees, cappuccinos, teas and infusions. The PID display enhances the level of temperature accuracy.
	Nuova Simonelli Oscar Espresso Machine	R 27 324,00	2 550,00	1 400,00	1 050,00	The Oscar much like its predecessor has been built around the idea of bringing professional quality espresso into the home. Besides the new stainless steel & ABS body, the Oscar hosts a number of new useful features that further push the limits of what an affordable home espresso machine can do. Including a new ergonomic steam lever, timed dosage, and improved steam-wand. Inside the machine the Oscar maintains its professional sized group head and copper boiler. Making the Oscar the perfect machine for any coffee enthusiast.
	Rocket Appartamento Compact Espresso Machine	R 50 368,57	4 650,00	2 550,00	1 850,00	The Appartamento is a compact espresso machine designed for environments where space is at a premium. Rocket engineers optimised the chassis and layout of the internal components without compromising on the quality and features you expect from Rocket Espresso. Available with white or copper circular side panel insert options
	Rocket Cronometro R PID Espresso Machine	R 66 378,00	6 150,00	3 350,00	2 450,00	Features taken directly from our commercial espresso machine range give the Cronometro machines superior technology that is not many only found in full sized commercial espresso machines. Now with digital shot timer, PID temperature control, insulated boilers and the Rocket Espresso 9 mm boiler end plates, stability and temperature control is further enhanced. The use of a rotary pump ensures quiet yet robust pump performance and allows the user to have the machine draw water from the internal machine reservoir or alternatively connect the machine directly to the water supply.

	Rocket Porta Via Espresso Machine	R	67 344,00	6 250,00	3 400,00	2 500,00	The Porta Via is the worlds first truly portable espresso machine allowing people to enjoy the Rocket Espresso experience where ever they are. Travel just got a whole lot more interesting – that 3 star hotel just went to a 5 star.

	Astoria Tanya 1	R	76 935,60	7 100,00	3 900,00	2 850,00	Well known for reliability, Astoria is continuously providing excellent equipment to the café & restaurant industry, and with the Tanya 1 group you can now easily brew café style beverages in the comfort of your home or office. The Tanya is your simple yet trustworthy solution to ensure a great brewing experience. This machine will elevate your morning coffee rituals with the easy to operate keypad and steam wand. With straightforward, coordinated design and manufactured with high end materials, the Tanya will continuously deliver quality espresso. Electronic with volumetric dosage of 4 coffee doses, programmable directly from the keypad.
	Astoria Tanya 2 (2Group)	R	91 729,20	8 500,00	4 650,00	3 400,00	Well known for reliability, Astoria is continuously providing excellent equipment to the café & restaurant industry. The Tanya is just that: your simple yet trustworthy professional solution. The Tanya is easy to operate with just enough details for optimised ease of use in your establishment: giving you and your baristas a great brewing experience. With straightforward, coordinated design and manufactured with high end materials, the Tanya will continuously deliver quality espresso. Two group electronic with volumetric dosage of 4 coffee doses, programmable directly from the keypad.
	Rancilio Classe 5 Compact (2 Group)		81 598,80	7 550,00	4 150,00	3 000,00	The compact is the perfect machine for a small coffee shop that does not do the volumes to justify a full size machine but that does need two groups for that big group of people that comes in at once. It can handle good volumes but will somewhat limited in handling high traffic volumes in short periods. (Large events, outlets with typical early morning rush hour). The compact is now available only in the Tall version allowing for the use of large take away cups upto 500ml in size. If the traffic flow is a consistent flow without large peaks this machine will work very well. The machine has a 5 liter boiler but runs a 3000W element (the same power as some full size machines) that allows it to cope with higher volumes without a problem. The compact is now also available in the auto (USB) version. (Picture of the USB shows the C-Lever steam knobs not available in SA)
	Rancilio Classe 5 Two Group (Gas)		85 198,80	7 900,00	4 300,00	3 150,00	The Rancilio Classe 5 is in a class of its own. The Classe 5 is available in a number of derivatives. Classe 5s Standard - 2 group semi-auto Classe 5s with gas - 2 group semi auto with a factory fitted gas burner in addition to the electrical heating element. Ideal for mobile or off the grid usage Classe 5USB - 2 group Automatic machine Classe 5 USB - 2 group Automatic machine with raised group heads to accommodate tall take away cups. It has an 11 liter boiler with a 4300W element to bring the machine up to heat in a short space of time and it will ensure that you never run out of steam!
	Rocket Boxer A2 (2 Group)	R	105 614,85	9 750,00	5 350,00	3 900,00	The Rocket Boxer is ideal for specialty coffee shops seeking simple and classic functionality. Rocket Espresso takes pride in their finished design, keeping with their iconic contemporary look for this machine. The stainless steel and aluminium finish will look great in any environment and truly give your customers something to look at. A smaller sized machine for those businesses where space is a premium, drawing on standard boiler size capacities that will cope with any peak service demand. Featuring a cool-touch steam wand as well as automated volumetric controls and automatic backflushing feature it's built for ease of use and efficient clean-up. The steaming power on these machines won't disappoint either.
	Rocket R9V (2 Group)	R	207 963,70	19 200,00	10 500,00	7 650,00	The R9V from Rocket's top of the range premium commercial espresso machines. It boasts a string of features that stand out against any machine out there. Much like Rocket's R9, it's a multi boiler machine offering dedicated boilers, PID, pre-infusion, shot timer and excellent repeatability for each of its saturated groups. This machine has added full pressure profiling, the key difference from the R9. In addition to the above features, it also offers lever style steam arms, cool to touch steam wands (no more worrying about the burns) and an adjustable drip tray. All encased in Rocket's signature stainless steel with chrome finish. This is the ultimate machine when it comes to commercial espresso. You get to control every second of the shot with fully adjustable pressure, backed up by rock solid temperature control. You can create pressure profiles, save them for later and match them with volumetrics for ultimate consistency, freeing your barista to focus on customers.
	Tempesta	R	352 000,00	32 450,00	17 750,00	12 950,00	Astoria's Tempesta represents a significant stride toward the technological advances in espresso equipment today. The Tempesta was conceptualized in collaboration with a trio of pro baristas who are accomplished on the global competition scene. The Tempesta is a fully equipped multi-boiler espresso machine with high-tech features that include a live graph of pressure and flow rate for every shot, independent brew boilers with PID temperature control, and cool-touch steam wands with extra power. Sitting pretty on countertop with Energy Saver technology that works. The system also offers three modes of use: an always-on mode, a scheduled programming mode with automatic standby periods, and an intelligent self-learning "Eco" mode in which the machine goes into standby automatically based on its own observations over time. Energy consumption and other usage data, such as the number of coffee and hot water drinks made, the volume of water consumption, the number of cleaning cycles performed, and more, can be exported for café guidance. Tempesta's long, cool-touch steam wands are designed to offer extra articulation, granting baristas greater flexibility in where and at what angle they stand in order to give spectators a view of the action. The machine feet and drip tray height are also adjustable for purposes of stability, ergonomics, and display. Everything has been designed with ergonomics in mind to ensure every coffee is a quality extraction and praise for the one who operates the Tempesta.
Coffee Bean Grinders
